PASSED AUDITS (16) Show

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

ARIA

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

NAMES AND LABELS

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

These are opportunities to improve the legibility of your content.

INTERNATIONALIZATION AND LOCALIZATION

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

These are opportunities to improve the interpretation of your content by users in different locales.

TABLES AND LISTS

These are opportunities to improve the experience of reading tabular or list data using assistive technology, like a screen reader.

NAVIGATION

These items address areas which an automated testing tool cannot cover. Learn more in our guide on <u>conducting an</u> <u>accessibility review</u>.
